ASSUMPTION COLLEGE SRIRACHA

Director's Message

Welcome Message for the Academic Year 2025

As we embark on the academic year 2025, Assumption College Sriracha proudly enters its ninth decade of educational excellence. Our commitment to sustained growth and quality education remains steadfast, aligned with the Ministry of Education's vision: "Quality Learning, Happy Students." We remain committed to our dual goals: fostering excellence and ensuring stability in life through education.

Our guiding philosophy is to serve as a hub of academic excellence that integrates innovation, technology, and moral values to develop future-ready leaders equipped for the 21st century. We strive to deliver a responsive, student-centered learning experience designed to be a safe, engaging, and nurturing space for our students. Our dedicated educators are not just instructors, but mentors and coaches who cultivate curiosity, inspire progress, and guide students in applying knowledge to real-life contexts.

To achieve this, we promote authentic learning by offering a track-based curriculum that allows students to tailor their education according to their interests and strengths. The curriculum has been thoughtfully developed to align with various career paths, providing students with greater flexibility and clearer direction.

We continue to invest in our educators by strengthening their capacity for integrative and student-centered teaching. This transformation empowers teachers to serve as facilitators of learning who nurture self-directed, lifelong learners. Our facilities have undergone major enhancements to foster creativity and well-being. Renovations have included modernized restrooms, upgraded art studios, and music and dance rooms, as well as an upgraded canteen, across key school buildings such as the Regina Coeli Building, Donatien Building, Sakda K. Building, and John Mary Building. Green spaces have also been expanded to promote a calm and pleasant learning atmosphere.

In line with our focus on digital literacy and innovation, we have made significant investments in educational technology:

- 78 all-in-one computers for classroom and academic use
- 124 iPads (Gen 10) for hands-on and sensory-based learning in kindergarten
- Learning center-based applications and tools for early primary students that encourage play-based and active learning
- 40 Samsung tablets for digital nutrition service management
- Upgraded interactive smartboards in classrooms to enhance engagement and access to multimedia resources

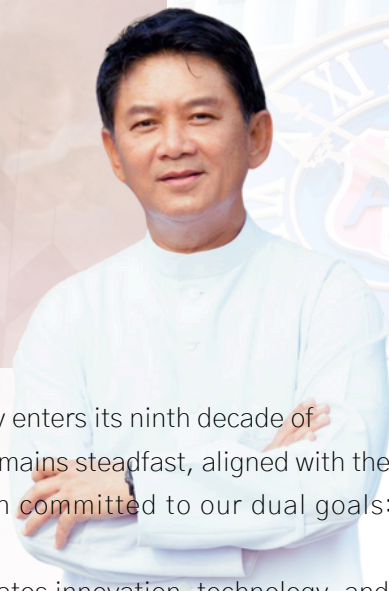

The start of a new academic year always brings change—whether through new classrooms, new friendships, or a new school entirely. We encourage all students to embrace these changes with enthusiasm and resilience. May this year be filled with meaningful learning, discovery, and personal growth.

To our esteemed parents, thank you for entrusting us with your child's education. Assumption College Sriracha proudly stands as the fifth institution under the Saint Gabriel's Foundation of Thailand. With over 80 years of distinguished history, we take pride in nurturing generations of capable individuals who serve both society and the nation.

May Our Lady of the Assumption, our patroness, and all that you hold sacred bestow upon you happiness, good health, safety, and continued prosperity.

Warm regards,

Bro. Pisutr Vapiso, f.s.g., Ph.D.
Director, Assumption College Sriracha
